

HOW AUTOBOOKS COMPARES:

For the small business, third-party payment competitors are easily accessible. These tools like Square, PayPal, etc have saturated the small business market with their products. And while those tools are easy to access the funds that are processed are not.

THAT'S WHERE **AUTOBOOKS** COMES IN!

Our customers do not even KNOW that payment & invoicing solutions are built right within their online banking platform! The goal at Autobooks is to get ahead of these customer cash-flow frustrations, and keep those deposits in the customer's bank account, not parked in a 3rd party app, and make it easier for the small business to run smoothly.

Unlimited number of invoices per month!

An **unlimited amount** of customers can be loaded into Autobooks.

Next-Day Funding available within Online Banking Accounts!

No minimum dollar amount on invoices sent.
